

Our Behind the Jump video is impacting young people with asthma.

Our [asthma schools study](#) worked with Greenwich and Lewisham Young People's Theatre (GLYPT) to produce the short asthma awareness film shot at the LEAP Parkour Park in Westminster, London.

A recent comment has high praise for the film

***“The timing of the release of this video after the recent tragedy within our community felt particularly important. I’ve been asthmatic since I was three years old, and have a lung capacity so pitiful that it shocks and confuses doctors every time I get retested (“are you sure you did the test right??”) but when I’m out training Parkour I always feel my healthiest. I should be less lazy about using my inhalers, this was a good reminder. Great video.”***
