

Do you need to demonstrate the economic impact of projects in your organisations?

Do you want to assess the outcomes and sustainability of a new service?

Are you tasked with carrying out an economic evaluation, but don't know where to start?

This one day, hands-on workshop aims to provide an introduction to addressing these challenges. It is run by the [NIHR CLAHRC North Thames Academy](#). The course is aimed at staff in frontline services in the NHS and local government, who have limited experience of conducting economic evaluations and decision making analysis.

After attending this course, you will have the skills and knowledge to undertake your own simple economic evaluation of a local intervention or service, and be able to appraise other evaluations.

The course will cover:

- **introduce the basic principles of economic evaluation methods**
- **explain how to assess the costs of an intervention/service**
- **explain how to measure and value outcomes of an intervention/service**
- **give practical examples of economic evaluation analysis**
- **help to understand how to use economic evaluation in decision making**

offer the opportunity to discuss in small groups the economic evaluation you are doing or thinking of doing. A facilitator will help scope your economic evaluation, draft its core elements, identify the data you will need to use, think how you could overcome information or data gaps

This worksop is suitable for staff from NHS Trusts, Local Authorities and CCGs who need to evaluate local programmes or service from an economic perspective as part of their work. It is not aimed at academics and/or researchers.

In order to be most beneficial for the participants, we invite applications from individuals who are carrying out or soon will need to carry out an economic evaluation of a service/intervention. In the selection process, we will give priority to applications providing a detailed description of such projects. **Groups of people working on the same project are encouraged to apply.**

No previous knowledge of economics is required (or experience of study design and statistics), however an interest in economics and being comfortable with numbers is desirable.

All participants will receive a certificate of attendance.

Cost - This course is free for staff working in NIHR CLAHRC North Thames partner organisations (please click [here](#) to see a list of our partners). There is a delegate fee of £250 for other attendees.

Registration - Please complete the [registration form](#) and email to clahrc.academy@ucl.ac.uk by **5pm, Friday 31st August 2018.**

Please note, a cancellation fee of £100 will be charged to both partner and non-partner delegates in the event of non-attendance without notice after 5pm, Wednesday 24th October 2018.
