

Three CLAHRC researchers were among those presenting their work at the Lancet's prestigious event **[Public Health Science: A National Conference Dedicated to New Research in UK Public Health](#)** held in London on November 24th.

Each of the CLAHRC's researchers presented a poster about their work, and the topics highlight the breadth of our research. Their abstracts are now [published in a special edition of the journal](#).

Dr Chiara De Poli presented projections of the likely impact of the various interventions currently being used to prevent diabetes across England.

Dr Esther Kwong presented her work exploring the potential for patient reported outcomes measures (PROMs) – patient questionnaires used to measure health gain in patients undergoing a number of surgeries – to be used when patients were admitted as an emergency.

Jennifer Martin presented her work on participatory learning and action cycle in resource-limited settings.

Impact of interventions to prevent diabetes in England: a simulation model

De Poli, Chiara et al.

The Lancet , Volume 390 , S36
