

Sachin is a Health Economist in the Department of Applied Health Research (DAHR) at UCL. He holds a Masters in International Health Policy and Health Economics from the London School of Economics and a Masters in Pharmacy from the University of Nottingham. Sachin has worked in the area of health economics since 2014 for multinational pharmaceutical companies, consultancies and academia. Prior to his appointment at UCL, Sachin was a Health Economist at QuintilesIMS, a health care consultancy. His primary focus was on performing health economic evaluation of novel treatments and devices, using economic modelling techniques in the areas of cancer and rheumatoid arthritis.

Sachin's current research is evaluating the 'real-world' cost-effectiveness and adoption of novel innovation of interconnected devices such as wearable monitors, data analysis and ways of working which may help patients stay well and monitor their conditions themselves as part of the NHS innovation test bed of NE London.
