

- Data extraction and critical appraisal
- Synthesis
- Reporting
- Writing

This one day, hands-on, interactive workshop offers librarians and other information professionals the chance to discover more about the systematic review process and how they can utilise many of the skills they already have within a systematic review. The workshop may also be of interest to researchers who have database searching experience and are keen to fine-tune their skills in both searching and reference management specific to systematic reviews.

**Developed by:** Evidence Synthesis Team, PenCLAHRC at the University of Exeter Medical School, in collaboration with clinical librarians at the Knowledge Spa, Royal Cornwall Hospital Trust.

**Delivered by:** [Alison Bethel](#), [Morwenna Rogers](#), (Information Specialists) and [Rebecca Abbott](#) (Systematic Reviewer)

**Organised by:** [Jenny Lowe](#)
